Using Envirosafe Multi Surface Cleaner & Sanitiser.

A treatment of Envirosafe has been applied to professional cleaning & infection control standards and verified by the use of test strips to evidence that the correct level of product has been applied.

Envirosafe has been independently tested and proven effective to a range of European Standards for microbial infection control: EN14476 - Viruses, EN1276 - Bacteria & EN1650 - Fungi. Proven effective microbial control against up to 99.9999% of harmful micro- organisms.

EN14476 - evaluation of virucidal activity in the medical area against all enveloped Viruses, including: Coronavirus (e.g. SARS, MERS), Poxviridae, Herpesviridae, Filoviridae (e.g. Ebola, Marburg), Flavivirus, Hepatitis C Virus (HCV), Hepatitis Delta Virus (HDV), Influenza Virus, Paramyxoviridae, Rubella Virus, Measles Virus, Rabies Virus, Human Immunodeficiency Virus (HIV), Human T Cell Leukemia Virus (HTLV) and Hepatitis B virus (HBV).

EN1276 - evaluation of bactericidal activity of chemical antiseptics and disinfectants against microbes such as: MRSA, Salmonella, E.Coli, Flu Virus (H1N1) and Pseudomonas Aeruginosa.

EN1650 - evaluates the efficacy of the product against fungus such as Aspergillus niger spores, for food, industrial, domestic and institutional areas.

Date of application: 01 July 2020
